

Leadership & Management

A one day, 5 star rated course from the training experts

Leadership & Management Course

The majority of people in management roles have developed naturally into the position with little guidance or any formal training, and are often dropped in the 'deep end'.

This can result in a 'trial by error' learning experience which can be equally difficult for both the manager and their staff. This course will help people effectively develop their management skills.

What you will gain:

- ✓ A comprehensive knowledge of the key skills and techniques required to be an effective manager
- ✓ A greater awareness and perspective of how to lead people to maximise their performance

Who should attend?

Anyone who has recently moved or is moving into a management role.

Managers who have never had any formal training in leadership and want to develop their understanding, tools and techniques so as to deliver better results, and feel more rewarding for themselves and the team.

Price and Venues

Manchester Science Park: £295 + VAT

Liverpool & Leeds: £345 + VAT

(We offer group discounts)

Private Courses

We offer private and one-to-one courses throughout the UK. Please email or call us with your preferred venue, number of delegates and any requests.

I am really pleased with what I learned and how many situations it will help with. Each topic gave great insight into why problems occur in the workplace and how to identify issues and address them. Overall an Excellent course.
